PROFESSIONAL SUMMARY

Computer Science graduate and Full-Stack + AI Engineer with hands-on experience building web and mobile applications, AI-powered products, SaaS platforms, and digital services. Experienced across frontend and backend development, AI/ML integration, databases, APIs, UI/UX, interactive web experiences, and cloud deployment. Builds products from concept and interface design through implementation, integration, deployment, and iteration, with a focus on practical software solutions and real-world problems.

WORK EXPERIENCE

Junior Developer, CoStream

May 2023 – July 2026

Abuja, Nigeria

- Developed and contributed to web and mobile applications across product and client-focused projects.
- Built responsive web interfaces using React and modern frontend development practices.
- Developed cross-platform mobile applications using Flutter.
- Translated product requirements and interface concepts into functional digital experiences.
- Worked within collaborative development workflows across frontend implementation and application development.

SELECTED PROJECTS

Trioline Data

VTU & Digital Services Platform

- Built a digital services platform covering airtime, data, electricity payments, examination pins, and cable subscriptions.
- Developed frontend functionality with React, TypeScript, Vite, and Tailwind CSS, supported by Node.js/Express backend services.
- Used Supabase/PostgreSQL for application data and backend services, including authentication and account functionality.
- Worked on wallet funding, payment workflows, external service-provider/API integrations, deployment, and troubleshooting.
- Deployment and infrastructure work across Vercel, Render, and Hostinger.

AI-Powered Collaborative Learning and Performance Support System

AI Education & Gamified Learning Platform

- Developed an AI-powered learning platform combining personalized study assistance, gamification, and academic collaboration.
- Implemented AI-assisted summaries, explanations, practice questions, quizzes, flashcards, and learning recommendations.
- Designed the Knowledge Arena with interactive learning modes and challenge-based experiences.
- Developed a Community Hub concept for academic resource sharing and AI-assisted academic support.
- Technology stack includes React, TypeScript, Vite, Tailwind CSS, Supabase/PostgreSQL, and Google Gemini.

Archer | Private Aviation

Premium Private Aviation Web Experience

- Developed a premium aviation web experience focused on responsive presentation, visual hierarchy, and interactive digital experiences.
- Applied UI/UX principles across typography, spacing, composition, responsiveness, and visual presentation.
- Worked with modern motion and interaction techniques to create an immersive web experience.

LegalConsult AI

AI-Powered Legal Technology Platform

- Developed an AI-focused legal technology concept around digital workflows for lawyers, students, supervisors, and clients.
- Explored role-based user experiences, AI-assisted workflows, and Google Gemini-powered assistance.
- Used Firebase-based application infrastructure for domain-specific product workflows.

Court2You

Legal Technology Platform

- Developed a legal technology concept focused on improving digital access to court and legal-related services.
- Explored web and mobile product experiences, user-focused workflows, and legal service automation.

EDUCATION

Nile University

B.Sc. Computer Science | Abuja, Nigeria

2023 – 2026

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, Tailwind CSS, Flutter, Framer, Vite

Backend: Node.js, Express, Python, FastAPI, REST APIs

Databases: PostgreSQL, Supabase, Firebase

AI / ML: AI/ML development, LLM applications, AI product development, AI automation, Gemini, Claude

UI / UX: Figma, UI/UX design, responsive design, product interface design

Motion / Interactive: GSAP, Framer Motion, WebGL, Higgsfield

Cloud / Tools: Vercel, Render, Netlify, Hostinger, Git, GitHub, VS Code

CERTIFICATIONS & PROFESSIONAL LEARNING

- Google Learning AI Certificate — 2024
- AI and Machine Learning — Microsoft — 2024
- Front-End Development — Vocational Schools — 2024
- Learning Data Science — Dicoding Academy — 2024
- Learning AI Basics — Dicoding Academy — 2024
- Advanced AI and Machine Learning — Class Central — 2024
- Building LLMs — Class Central — 2024

PROFESSIONAL FOCUS

Full-Stack Software Engineering • Artificial Intelligence & Machine Learning • Generative AI & LLM Applications • AI Product Development • SaaS Development • AI Automation • Web & Mobile Application Development • Interactive Web Experiences • UI/UX

PROFESSIONAL STRENGTHS

Communication • Problem Solving • Critical Thinking • Creativity • Teamwork • Adaptability • Leadership • Time Management

LANGUAGES

English — Fluent
